

SJ-400 BUTTERFLY VALVE

For pressure rating, listing, and approval information, refer to data sheet or visit SHURJOINT website www.shurjoint.com for details or contact your SHURJOINT representatives.

The Model SJ-400L Butterfly Valve is a grooved-end stainless steel butterfly valve designed for 300 psi service, supplied with a 10-position locking lever handle. The end-to-end dimensions conform to MSS SP-67. The body is investment cast in grade CF8M (type 316) to ASTM A743 with integral neck and ISO mounting top flange. The neck height allows for insulation up to two inches. The disc is a dual-seal type, encapsulated either with Gr. E-pw EPDM for cold and hot water services or with Gr. T Nitrile for oil services. SJ-400-L Butterfly Valves with standard disc and Gr. E-pw EPDM seat are UL classified to NSF/ANSI 61 and NSF/ANSI 372.

material specification

- **Valve Body:**
Gr. CF8M (Type 316) stainless steel to ASTM A743 or A351 or A744 which is UL classified in accordance with NSF/ANSI 61 and NSF/ANSI 372 for potable water use to temperature 180°F (82°C).
- **Lever Handle**
ASTM A351 CF8
- **Stems:**
Stainless steel Type 410 to ASTM A582.
- **Disc:**
Gr. CF8M (Type 316) encapsulated with Gr. E-pw EPDM.
- **Disc Encapsulation:**
Grade "E-pw" EPDM: EPDM Rubber is classified in accordance with NSF/ANSI 61 and NSF/ANSI 372 for potable water use to temperature 180°F (82°C)
 - (Optional) Gr. E - EPDM.
 - Gr. T - Nitrile.
- **O-rings:**
EPDM

† The weight includes the lever handle.

*Working pressure is based on connection with roll- or cut-grooved standard wall stainless steel pipe.

For pressure rating, listing, and approval information, refer to data sheet or visit SHURJOINT website www.shurjoint.com for details or contact your SHURJOINT representatives.

The Model SJ-400W Butterfly Valve is a grooved-end stainless steel butterfly valve designed for 300 psi service, supplied with a worm gear operator. The ISO5211 mounting pad allows for the mounting of power actuators. The end-to-end dimensions conform to MSS SP-67. The body is available in grade CF8M (type 316) to ASTM A743 with integral neck and ISO mounting top flange. The disc is a dual-seal type, encapsulated with Gr. E EPDM for cold and hot water services

† The weight includes the worm gear.

*Working pressure is based on connection with roll- or cut-grooved standard wall stainless steel pipe.

Flow Data

Equivalent length and Cv values for flow of water are shown below (water temperature at +86°F or +30°C)

This chart should be used as a general guide.

Nominal Size	Equivalent Length on Sch. 40 pipe*	Cv Values
in	Feet (Meter)	
2	8.1 (2.48)	120
2½	8.1 (2.48)	210
3	8.4 (2.56)	380
4	8.3 (2.53)	720
5	9.8 (2.99)	1150
6	7.4 (2.26)	2250
8	11.0 (3.35)	3800
10	10.5 (3.20)	5500
12	12.0 (3.66)	8250

*At 15 feet/sec. (4.6m/s) velocity of water.

General note

- Maximum Working Pressure (CWP) listed is the maximum cold water pressure for general piping services tested to ASTM F1476 and or AWWA C606 methods. Figures listed are based on roll- or cut-grooved standard wall carbon steel pipe. For other pipe schedules or pipe materials, contact Shurjoint for additional information.
- Field Joint Test: For one time only, the system may be tested hydrostatically at 1½ times the maximum working pressure listed (AWWA C606 5.2.3).
- Warning: Piping systems must always be depressurized and drained before attempting disassembly and or removal of any components.
- The 10 Year Limited Warranty applies to manufacturing defects only and does not cover severe service/temperature applications or wear parts.
- Shurjoint reserves the right to change specifications, designs and or standard without notice and without incurring any obligations.
